## WORK EXPERIENCE

---

### Forward Deployed Engineer, DevRev

Apr 2026 - Present

- Built a scheduled workflow that replaced three connector snap-ins (BigQuery, Snowflake, PostgREST) for dataset registration, registering 167 datasets with zero failures.
- Built a zero-copy, read-only BigQuery connector in TypeScript with LLM-based table classification and ACL mirroring.
- Implemented RS256 JWT signing and OAuth2 flows from scratch to run inside a restricted Python sandbox.
- Moved automations to service-owned credentials and worked on the Granola migration for reliable transcript sync.

### AI Engineer, ScroBits Technologies

Aug 2025 - Mar 2026

- Built an agentic enterprise RAG system with FastAPI, LangGraph and Pinecone, with multi-tenant semantic search, human-in-the-loop escalation and real-time dashboards, using FastMCP for tools and prompts; cut query time by ~60% and token usage by ~40%.
- Built a multi-agent AI support chatbot (FastAPI, LangGraph, Pinecone, Gemini) with 95% query routing accuracy, 40% lower latency, real-time human escalation and zero-config embedding.
- Built a production voice-powered AI assistant that manipulates the website in real time from users' spoken queries.
- Engineered a multi-agent media monitoring and knowledge assistant with LangChain, Gemini and RAG on Pinecone, connecting Retriever and Query agents through FastAPI and a WhatsApp webhook.

### Machine Learning Intern, Manastik

Nov 2023 - Apr 2024

- Built a real-time MediaPipe pose detection model deployed with TFLite, reaching 93% accuracy.
- Built a pose estimation repetition counter trained on 10,000 exercise photos, reaching 95% accuracy.
- Designed the in-app posture detection flow with three scoring metrics based on the yoga pose performed.

## PROJECTS

---

### Aroven – Fitness Tracking & Coaching Platform

[Website](#) | [Web App](#)

- My first product: a platform for individuals and coaches with workout logging, AI-assisted calorie and macro tracking, daily check-ins (weight, sleep, hydration, recovery, progress photos) and a coach dashboard with health scores, at-risk client alerts and program templates.

### AutoVoice – AI-Powered YouTube Knowledge Base

[GitHub Repo](#) | [Live Demo](#)

- AI video research assistant with a Python RAG pipeline (LangChain + Pinecone) that indexes 50+ YouTube transcripts concurrently for sub-second semantic search and context-aware Q&A, on a Next.js + FastAPI stack with real-time speech-to-text, ElevenLabs text-to-speech and a custom transcript ingestion service.

### Convo – AI-Powered Chat Application

[GitHub Repo](#) | [Live Demo](#)

- Real-time chat application with an integrated AI assistant and JWT auth on the MERN stack, with a responsive Tailwind UI and MongoDB Atlas, deployed on Render.

## EDUCATION

---

2023 - 2025 M.Tech (Data Science and Analytics) at **MIT WPU, Pune** (GPA: 8.3)  
2019 - 2023 B.Tech (Computer Engineering) at **Savitribai Phule Pune University** (GPA: 8.0)
